

ELIASON LAUNCHES NEW RMR 1500 TRAFFIC DOOR

January 2010 - Eliason, a leading manufacturer of commercial double action traffic doors and energy saving products has released its new RMR 1500 Traffic Door. The RMR 1500 is a rotationally molded, monolithic door panel with a CFC-free foam core and full perimeter gaskets that provides a cost effective solution for retail, walk-in cooler and light industrial applications.

The all new RMR 1500 double acting traffic door is the latest innovative solution from Eliason and combines two great pieces of technology into one very tough and attractive door. The 1.5" thick monolithic door panel is rotationally molded with an outer skin thickness of .188" and the core is foamed in place with CFC-free urethane foam providing excellent insulation properties. Most importantly, the RMR 1500 operates on the time-tested Eliason Easy Swing hinging system that is second to none in the traffic door industry. The results are a durable, attractive door panel that is easy to open, closes automatically, possesses outstanding insulating characteristics, requires virtually no maintenance and is ADA compliant.

The RMR 1500 is loaded with standard features, including monolithic construction, 18" high Easy Spring Bumpers, 3" X 9" jamb guards, Eliason Easy Swing® hinges and an 18" X 18" clear acrylic vision panel mounted in a two-piece black molded window frame. The door also comes in a variety of colors.

An investment in the RMR 1500 brings the most significant development to hit the double-acting traffic door industry in years. The RMR will provide years of trouble free

service backed by Eliason's industry best five year warranty against defects in materials and workmanship.

Eliason, founded in 1952, manufactures custom commercial traffic doors and energy saving products in our 110,000 sq. ft. facility in Kalamazoo, Michigan. With a lead time of two weeks on our custom products, we are able to quickly serve our valued customers.
